BACKGROUND SUMMARY

A fully qualified AT&T inside and outside plant technician with over 20 experience in the installation and maintenance of telephony central office equipment - including, but not limited to – air conditioning and power, Lucent and Nortel OC48, OC12 and OC3 fiber mux equipment and DACS frames, RelTec DISC*S, and Lucent SLC remote terminals.

PROFESSIONAL ACCOMPLISHMENTS

- * Managed AT&T's Orlando Web Hosting Project, acting as team leader - overseeing, approving, and placing in service, a three node OC48 ring with an optically extended OC3 mux at the customer premises, resulting in a completed project meeting the customers' expectation, and five days ahead of it's due date.
- * Managed and implemented AT&T's FT2000 OC48 software upgrade of over 3000 network elements in a short period of time with minimal customer disruption, resulting in an increased reliability in AT&T's fiber ring infrastructure.
- * Installed and maintained complex central office transmission equipment resulting in minimal downtime of AT&T 's Local Service and Wireless telephone networks.
